DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-13, 15-18, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by US patent #5,664,127 (Anderson et al).

- As for claims 1, 6, 11, 16: Anderson et al teach a computer implemented system and corresponding method for displaying information in a table 250 in a graphical user interface, the table 250 comprises a plurality of rows (figure 2C), comprising:

a table presentation module (col. 7, line 51, "Notebook and Pages") that present one or more portions of the table in a graphical user interface,

a user selectable graphics presentation module 260 that presents one or more user selectable graphical portions in the graphical user interface, each user selectable graphical portion represents other portions of the table.

- As for claims 2-3, 7-8, 12, 17: The system includes means for selecting a tab 260 and displaying a portion of the table corresponding to the selected tab (col. 8, line 41 "Navigation in a Notebook").

Art Unit: 2173

- As for claim 4, 9, 13, 18: The portion comprises one or more rows (figure 2, 3).
- As for claims 5, 10: The user selectable portion comprises data display (figures 4, 5).

The system further comprises an edit module for editing the data (col. 10, line 37, "Advanced Editing").

- As for claims 15, 20: Each user selectable portion is identified by its name (figure 4G, "Salad").

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 14 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson et al.

- As for claims 14, 19: Anderson et al fail to clearly teach that the portion comprises a single row. However since the number of rows in depends on the amount of data needed to be presented in the portion of the table. It would have been obvious to one of ordinary skill in the art, at the time of the invention was made, to implement the presenting of the single row portion table data. Motivation of the implementation is for the simplicity of the editing.
